

**National Interagency Coordination Center
Incident Management Situation Report
Thursday, September 21, 2006 - 0530 MDT
National Preparedness Level 4**

National Fire Activity

Initial attack activity: Light (54 new fires)

New large fires: 2 (*)

Large fires contained: 3

Uncontained large fires: 25

Area Command Teams: 2

Type 1 IMTs committed: 9

Type 2 IMTs committed: 9

Fire Use Teams:

** Uncontained large fires do not include WFU or confine/contain incidents. **

Australia and New Zealand assisting with 67 fire specialists and managers.

Southern California Area (PL 4)

New fires: 19

New large fires: 1

Uncontained large fires: 4

Area Command Teams: 1

Type 1 IMTs committed 3

Type 2 IMTs committed: 2

Area Command Team (Waterbury) assigned to manage the Day fire.

Day, Los Padres NF. IMT 1 (Pincha-Tulley, Dietrich and Custer). Twenty-two miles northwest of Santa Clarita, CA. Chaparral and timber. Active backing fire. Structures, campgrounds, power and gas lines, communication and archeological sites threatened. Structure protection in place.

Pinnacles, San Bernardino NF. IMT 2 (Garwood). Four miles northwest of Lake Arrowhead, CA. Brush and grass. Creeping and smoldering. Highway 173 closed.

Pines, Angeles NF. IMT 2 (Walker). Eight miles north of Pasadena, CA. Chaparral. Short runs, isolated torching and creeping. Structures and power lines threatened.

Sawmill, Inyo NF. Thirty-six miles northwest of Bishop, CA. Chaparral, pinyon pine and juniper. Minimal fire activity. Cultural sites threatened.

SCF - Salmon-Challis NF

Northwest Area (PL 3)

New fires: 0
 New large fires: 0
 Uncontained large fires: 8
 Type 2 IMTs committed: 2

Columbia Complex, Southeast, Washington DNR. IMT 2 (Jennings). Fifteen miles northeast of Walla Walla, WA. Grass, brush and timber. Smoldering and creeping. Residences, a ski area and watershed threatened.

Tripod Complex, Okanogan-Wenatchee NF. IMT 2 (Gormley). IMT also managing the Tatoosh Complex and Van Peak fires. Seven miles northeast of Winthrop, WA. Mixed conifer. Smoldering.

Tatoosh Complex, Okanogan-Wenatchee NF. Twenty-four miles northwest of Mazama, WA. Timber. Smoldering. Monitoring by air. Decrease in acreage due to the removal of Border Lake fire.

Van Peak, Okanogan-Wenatchee NF. Thirty-one miles north of Winthrop, WA. Timber and dead and down fuels. Smoldering. Monitoring by air.

Twin Elk Complex (two fires), Wallowa-Whitman NF. Includes previously reported Elkhorn and Twin Lakes Complexes. Twenty-one miles southeast of Joseph, OR. Timber. Smoldering.

Shake Table Complex, Malheur NF. Nine miles southeast of Dayville, OR. Timber. No new information reported.

Flick Creek, North Cascades NP. One mile east of Stehekin, WA. Mixed conifer. No new information reported. This will be the last report unless new information is received.

Cedar Creek, Okanogan-Wenatchee NF. Eight miles southwest of Mazama, WA. Timber. No new information reported.

Tinpan, Okanogan-Wenatchee NF. Seven miles west of Lucerne, WA. Timber. This will be the last report unless significant activity occurs.

Predictive Services Discussion

Strong winds are on tap for Northern California Thursday night and Friday while southern California will see cooler temperatures through Friday. High pressure building over northern California will lead to strong north to northeast winds Thursday night and Friday along with lowering humidity. In southern California, a deeper marine layer and cooler temperatures are expected through Friday. However, the humidity will remain quite low above the marine layer.

DRIVING SAFETY

Driving is one of the most hazardous tasks that we perform when assigned to fires. Because of the fact that we perform the task literally hundreds of times in the course of our daily lives we tend to take it for granted. Based on recent accident trends, vehicle accidents are the source of more deaths and serious injuries to wildland firefighters than any other single cause. Vehicle operators need to recognize their own poor driving habits and strive to develop proper defensive driving techniques.

- A good starting point is attitude. A positive attitude towards improving your defensive driving skills will help you achieve the necessary changes in your driving habits. Most of what you do in operating vehicles is performed from habit. You do not consciously think about every thing you do when you drive. Rather, your subconscious performs most techniques. It's important to remember that a bad habit is as easy to develop as a good one. Take a good, hard look at your driving habits. Are you training yourself to do the right things the right way, like fastening your seat belt, checking your mirrors, and maintaining safe following distances?
- Inattentiveness is a major contributing factor in motor vehicle accidents within the wildland firefighting community. Because driving is such a common component of our lives, it is difficult to realize that it requires 100% of our attention. Since the average adult attention span is 15-20 minutes we must develop techniques that allow us to refocus our attention on the task at hand, operating a motor vehicle safely. There are many forms of inattentive driving; fatigue, telematics, daydreaming, eating, drinking, reading, writing, and talking. Here are some techniques for maintaining your attention while driving.
 - Drive only when you are well rested and alert; avoid driving during the hours of 10:00 PM and 6:00 AM. Take a 10 to 15 minute break after every 2 hours of driving.
 - Practice situational awareness when driving; be aware of what is happening in front, behind, and on both sides of your vehicle. Never drive when taking medications that make you drowsy.
 - Avoid using cell phones, radios, GPS units, CD players or computers while driving. Have a passenger operate them, or pull off the road and park.
 - By constantly moving your vision, checking mirrors and distant road conditions, you can avoid highway hypnosis and daydreaming.
 - Avoid eating or drinking while driving. Take frequent breaks to perform these activities.
 - Do not attempt to read maps or write directions while driving, pull over and park.
 - When talking with passengers, keep your eyes on the road and both hands on the steering wheel. Keep conversations casual and limited to small talk. Avoid conversations of a serious or technical nature. Do not engage in confrontational or argumentative conversations.
 - Do not be in a hurry, be patient. The more impatient you are, the more agitated you can become. Agitation will only magnify other inattentive driving behaviors.
- Safe driving starts with a safe vehicle. While mechanical failure is rarely a contributing factor in motor vehicle accidents something as simple as under inflated tires can have serious consequences. Before operating any vehicle, you must be sure the vehicle is in safe operating condition. Not only should you perform a pre-operation inspection, some vehicle defects can only be detected while the vehicle is operating. The vehicle operator is also responsible pre-operation, during operation, and post-operation inspections.
